

Serenity

Sliding Door Systems

Introducing

THE ANTIMICROBIAL SLIDE

Now is the time to put patient safety first. We're able to provide a complete antimicrobial door system inclusive of door, frame, and all required hardware. Our specialty products and treatments are specifically suited to inhibit the growth of microorganisms. Serenity's Antimicrobial Slide is ideal for many applications including laboratories, bathrooms, hospitals, and other high use areas. Our proprietary safety-first package includes the following:

Our Frame

We apply an antimicrobial powder coat to the entire surface of the frame material.

Our Door

We can provide an antimicrobial finish for any aluminum, hollow metal, plastic laminate or wood veneer doors.

Our Hardware

Our system can be equipped with different hardware options including antimicrobial finishes or manufactured with a bactericidal copper alloy.
