

— CUSTOMIZE SMALL SPACES

TeleSlide

Opening by sliding one door in front of the other, this multi-door system is perfect for larger openings and tight spaces.

- ✔ Creates Custom Barrier
- ✔ Maximizes Functionality
- ✔ Divides Larger Spaces

Solve Larger Openings Without Sacrificing Space

As the TeleSlide opens by sliding one door in front of the other, it is an ideal solution for small spaces. While it can expand or contract based on your needs, it's great for providing flexibility for your facility. Equipped with a soft close, these systems are quiet and easy to operate. For those looking to secure a space, locking options are available.
